Dental Laboratory Technology

Certificate Course

This program is designed to prepare students for employment as dental laboratory technicians whose major tasks include construction and repair of all types of dental prosthetic appliances. Students are trained in the art of basic crown and bridge fabrication orthodontics. This program requires a total of 1,200 hours.

Associate Degree

Dental laboratory technicians are valuable members of the dental health care team. This 99-credit program consists of basic morphology to advanced hands-on skills and techniques in designing and constructing dental replacements such as crowns, bridges, ceramics, and denture appliances. Students also acquire skills (modeling, wax-up, build-up, creative design, fitting and finishing) that are essential in dentistry.

 - Recognized in National Board for Certification in Dental Laboratory Technology (NBC) and membership in National Association of Dental Laboratories (NADL)
- Professional instructors who has outstanding knowledge and hands-on skills
- Variety of Experience
 - Field trips and Guest Speaker sessions

Dental Laboratory Tech Prospects

- As cosmetic prosthetics, such as veneers and crowns, become less expensive, there should be an increase in demand for these appliances. Accidents and poor oral health, which can cause damage and loss of teeth, will continue to create a need for dental laboratory technician services. Dental technician services will be in demand, as dentists work to improve the aesthetics and function of patients' teeth.
- In Virginia, there are approximately 500 dental labs that seek skilled professionals.
- Most dental laboratory technicians work full time and the annual mean wages in Washington D.C. metropolitan area for dental laboratory technicians is between \$39,720 to \$53,610 in May 2013.
